REAL NAME: James Buchanan Barnes
AKA: Captain America

After the apparent murder of Steve Rogers, the man who was Captain America, Cap's former partner during World War II, James "Bucky" Barnes, has taken on Steve's mantle and his mission. Even now that Steve Rogers has returned from the grave, Bucky continues to wield the shield as Captain America.

During the 1950s, while the original Cap was in suspended animation, another Captain America was created. While a nearly perfect physical match for Steve Rogers, this new and recently revived Cap became severely mentally unstable and now leads an army whose purpose is to "reclaim" America.

Bucky, with the assistance of Sam Wilson, aka the Falcon, infiltrated the Watchdogs, the paramilitary anti-government ring, in hopes of apprehending the rogue Captain America. The plan backfired and now both Bucky and the Falcon have been captured themselves.
